Entreprise : Goldstar Minerals inc (GDM)

Project: Upton

Clarification concerning the Geological Report on mining titles

Introduction

At the request of David Crevier CEO of GDM, Jacques Marchand Eng. is mandated to make a geological presentation summary concerning 8 mining titles newly acquired on behalf of GDM.

The following is a clarification regarding the report you March 8, 2023

Mining Title

CDG 2646187, 2646188, 2646189, 2648534, 2648535, 2648536, 2648537, 2648538.

Accuracy Requested

Q : Can Mr. Marchand confirm that there has not been material works on the Upton Claims since the last technical report of April 2013?

A: The Author confirms, there is no material work on the titles since the last technical report of April 2013.

Q : Please confirm that a Geological Report will be prepared in accordance with National Instrument 43-101. As previously mentioned, the conditional acceptance of the Exchange to the transaction will be the preparation of a new updated Geological Report. For clarity that Geological Report is not requested prior to resumption to trading.

A: The author confirms, a Geological Report (compliant with Regulation 43-101) is to be prepared following the planned exploration work (compilation, geology, geochemistry, geophysics, drilling, calculation of the mineral resource).

Signature and Seal
